Senior Backend Developer

Software engineer with 11 years of experience in development and technical support, specializing in Java, Spring, and MySQL. Led refactoring of legacy modules, reducing defects by ~80% in 2025, and managed incident resolution for critical systems. Built enterprise apps, improved UI usability, and increased test coverage for stability.

WORK EXPERIENCE

Gainwell Technologies LLC Senior Software Engineer

09/2015 – Present

- Lead development and maintenance of a Medicaid CMS platform for 1M+ users, building enterprise web apps with Java 17, Spring, Hibernate, JSP, and REST APIs.
- Served as SME for core modules, guiding architecture for new features and helping plan technical roadmaps and backlog priorities during Agile sprints.
- Led onboarding and knowledge transfer for new engineers; conducted code reviews, architecture discussions, and mentored junior developers.
- Within 2 quarters, refactored a legacy monolith into a modular layered architecture with reusable components and service abstractions, increased performance, and cut defects 40%.
- Created unit and integration tests using JUnit and Mockito, increasing test coverage and improving release stability.

iDocket, LLC Systems Developer

07/2013 – 03/2015

- Developed a Records Management System (RMS) using Java/J2EE, Spring MVC, JavaScript, HTML/CSS, AJAX, and MySQL.
- Implemented a digital media module for uploading and playback of evidence files for legal teams, helping secure two new clients within 2 months of implementation.
- Supported end-user testing and performed production issue analysis and debugging on Windows and Linux (CentOS).

The University of Texas at El Paso Technical Support Specialist

02/2010 – 06/2013

- Provided technical support and troubleshooting for Windows and Linux (CentOS) desktops and servers.
- Installed and configured server racks, network hardware, and computer lab environments.
- Within four weeks, deployed Windows & Linux images across labs with Norton Ghost, cutting setup time by 40% and enabling classrooms to be ready ahead of schedule.

EDUCATION

B.S. in Computer Science

The University of Texas at El Paso

SKILLS

Programming Languages: C#, CSS, HTML, J2EE, Java, JavaScript, PHP, SQL

Frameworks/Libraries: Hibernate, JSP/ Servlets, Microservices, REST APIs, Spring Boot, Spring Framework

Development Tools: Ant, Eclipse, Git, GitLab, IntelliJ, Jenkins, Maven, MyEclipse, SVN, Visual Studio

Testing & QA: JUnit, Mockito, Selenium WebDriver, Test- Driven Development (TDD), Unit Testing

Databases: MySQL, Oracle, SQL Server

Cloud & DevOps: Agile/ Scrum, AWS (EC2, S3), CI/ CD, Docker, Kanban

Operating Systems: Linux (CentOS), Windows

Methodologies: Design Patterns, Incident Management, Object- Oriented Programming (OOP), Production Support, Software Development Life Cycle (SDLC), Technical Documentation, Troubleshooting
